Secretary Guthrie,

If there was nothing to find fault with, the world would feel lost and yawn itself to death. Lock jaw would inevitably supervene; rather than such a thing as that should happen, we would even consent for a comet to whisk its tail around, and make a summary disposal of all our creditors, their heirs, and assigns. Of course we should feel very sorry, as in duty bound, but we are willing to make almost any sacrifice for the benefit of suffering humanity. Actuated by this enlarged sentiment of benevolence, we feel much rejoiced to discover that Secretary Guthrie's letter to Collector Bronson, of New York, upon the subject of the official patronage at his disposal, promise to supply our friends and cotemporaries of the opposition press with food for grumbling and denunciation for some time to come. It may save them from death or paralysis, and it will hurt nobody, since, in fact, the Secretary's letter simply gives form and expression to what everybody knows now is, and must be policy of the administration; and, permit us to say, ought to be the policy of any administration, under similar circumstances. Everybody knows, that when a new administration comes into power, it aims to commit the execution of its policy to subordinates of the the same political views with itself, who may be reasonably expected to feel a more zealous interest in its successful working than those politically inimical to it. Right or wrong, such is the system, and we presume will continue so to be. So much may fairly be taken for granted, and of this, Collector Bronson was of course aware. Further: Evarybody remembers the tremer dous sectional agitation, which, a very few years ago disturbed the country from one end to the other, threatening even the perpetuity of the Union itself. At length, a scheme of adjustment, known in the aggregate as "the compromise," was agreed upon and enacted by Congress. This was to be a finality. Upon it, as such, the Baltimore Democratic Convention settled down, and upon the platform of that Convention, the Democratic party united, and its nominee, Gen. Pierce, was elected by the party so united. It was understood that this distracting question of slavery should not be re-opened. That in making appointments, the compromise and the Baltimore platform should be the test among Democrats, and nobody looked to a Democratic administration to appoint Whigs. Such being the facts of the case. it does certainly appear evident, that any attempt to go behind the record, and institute distinctions founded upon sectional feuds, which it is the interest of the country at large to consider finally settled. could only have a tendency to re-awaken a dangerous agitation, and seriously threaten, not simply the party in power, but the peace and quiet, and, it might be, the very existence of the Union itself.

Regarded in this plain, common-sense light, will be at once perceived that Secretary Guthrie's letter to the Collector at New York simply presses upon the attention of that functionary the impropriety of allowing the action of Government officers, in making appointments, to be influenced by sectional difficulties, which it is to the interest of the country to consider settled by the compromise, which compromise the administration stands pledged to recognize and support. In fact, what guarantee could we have for the sincerity of any professions in ings by Mr. MULLER, Civil Engineer, of this place. favor of the Union and of the compromise as a finality, if the admini-tration making such professions allowed invidious distinctions to be made on account of matters anterior to the compromise, and said to promises to be a handsome and substantial structure. be finally settled by it?

We like to please everybody, or rather, we like that everybody should be pleased-should have some crumb of comfort, and we are sorry to deprive our grumbling cotemporaries of the Whig, or "somewhat" Democratic presses of the little consolation they might derive from supposing that the Cabinet is divided in this matter. General Davis, it was thought, was this way, and Mr. Somebody else another. This is not so. Mr. Davis is just as national as any other member of the Cabinet.

As the troops were passing before him, he suddeny raised his hand as a signal for a halt, when he ismounted, walked up to a private in the ranks, and asked him to unbutton his coat. On finding that the soldier was without a shirt, the Emperor promptly orlered the officers of the Company to Siberia, and the officers of the regiment were instantly degraded to the rank of privates. Some two hours afterwards, Nicholas made another inspection of the condition of the soldiers; and finding all right, promoted every officer in the Division, conferring the orders with his own hand. It is this kind of discipline that makes the Russian army the most efficient in the world, and the head of it the idol of the common soldier."
